Message from Emergency Coordinator

October continues to be quiet. However, we did have a couple of public service events.

November will be a busy month. Remember that there will be no regular meeting on Monday, November 8. Additionally, there will be no monthly Health Net on the third Wednesday, November 17.

On November the first, there was a STARES, Inc., emergency board meeting at 7 pm at the regular meeting place on airport road. The emergency board meeting addressed several items that have come up. Anyone and everyone was invited to this board meeting and the discussion to follow.

Among other things, we were looking for a president of the corporation. Anyone wishing to serve in that position please contact Cris Simpson: kj6eyt@gmail.com. You do not have to be a member of the corporation to serve.

On November 6, we were involved in the Shasta County Mass Vaccination Exercise. This exercise will commence at 0800 in the morning on Saturday. We deployed on this exercise to the county Fairgrounds with the comm trailer and Shasta County Health EOC.

On November 17th, we will be involved with the Shasta Dam-Health Exercise for Shasta and Trinity Counties. This exercise will also start at 0800 in the morning on Wednesday. I have several volunteers for this exercise, but like above, I would like to see everyone that has the time, to get involved. We will be deploying to as many served agencies that we can.

On November 18th, we will be involved with a Health Exercise in Tehama, with Lassen and Siskiyou Counties also participating. We will deploy with the comm trailer. To St. Elizabeth's Hospital and Tehama County Health. Need many more

wo6p@arrl.net

volunteers for this drill.

All of the above listed activities are designed to train individuals in case of a real emergency. So for all of you that can participate, let me know by email or land line so I can draw up a working comm plan.

The three exercises will be prefaced by a call to me stating that we are needed. When that happens, I will get the telephone tree going and emails and will come up on the 146.640, pl 88.5 machine. If you are playing or not, please take the time to check into the net. This is the means that I have to notify and assign all participants.

I will keep everyone up-to-date with emails before every event happens. If there are any questions, please do not hesitate to contact me.

December 17th ARCA/STARES Christmas party, more info to follow.

73's

Richard V. Cloyd WO6P

Section News

Current Section News can be found at the ARRL Sacramento Valley Section (SV) web page: <http://www2.arrl.org/sections/SV.html>

Third Wednesday Client Net - No November Net

The next client net is December 15, 2010. Anyone is welcome to check in at 11 a.m. (HF) on 3.987 and/or 11:10 a.m. (VHF) on 145.350 (pl 107.2). Packet operators can check in anytime to W6STA-1.

NCS will encourage newly licensed hams to check in.

STARES Monday Night Net Control Operators

Thank you volunteers!

October- Dick Karpinen K6LJC

November - Dick Cloyd WO6P

December - Tom Henthorn KI6WAN

Third Wednesday Net Control Operators:

Thank you volunteers!

STARES Meetings & Nets

Special Note: No regular meeting for November or December

Meeting:

The second Monday of each month

Time: 7 pm

Location: 3644 Avtech Parkway,
Redding, CA 96002

SWAP, SELL, BUY SECTION - NEW LISTINGS ARE IN GREEN TEXT

Email Elaine Grossman KG6ZCE at kg6zce@yahoo.com if you have items you want listed in this section. Please include contact information in your e-mail and the text you want pasted into the newsletter. I will continue to list the items until you ask that they be removed. Thank you.

Base Diamond dual band 6/10 meter antenna. #357-3795 Dave Paulson KN6KI

Three towers for sale. Each tower is triangular, each tower is made of three sections, each is telescoping and each is made of heavy duty galvanized steel. The telescoping feature includes the standard gear driven telescoping mechanism.

1. Tower one is brand new and still in its crated shipping container. The triangular base section is built on a 22" leg equilateral triangle and is 20' high. The other two sections fit within the base section. The tower is extendable to approximately 60'.

2. Tower two is assembled and bolted to a concrete foundation. The concrete section is approximately 5'x5'x4' and is available with the tower. The tower is on a 24" leg equilateral triangle and the base section is 25'. The tower is telescoping with two other sections fitting within the first section so the approximate extension is 75' tall. Several antennas are fitted to the tower and are available with the tower.

3. Tower three is similar to tower two except each section is 16' tall. There is one antenna on the tower and the antenna is available with the tower.

Each tower is available separately or all three towers are available as a package.

The towers are located in Redding, California.

The weight and load factors may require a crane and a flatbed for dismantling and transportation.
